CARDEXCHANGE® ADMIN CENTER

FEATURE LIST

CARDEXCHANGE®

ADMIN CENTER

CardExchange® Admin Center is the central location where you can manage all your cloud applications. Admin Center offers you the possibility to easily customize your cloud products to meet your specific needs. From creating your own business rules, workflows, personalization by uploading your company logo to controlling what every user can see and do with profiles and permissions, CardExchange® Admin puts the power in your hands.

CardExchange® Admin Center is WCAG and VPAT compliant with an intuitive design allowing for ease of use. With the ability to adjust the interface for your users specific needs, CardExchange® Admin provides the perfect solution for a custom interface.

CONFIGURATION

CardExchange® Admin Center allows you to configure how you want the CardExchange® Controller to operate. You can set your credentials to move through the stages of production automatically, and you can define thresholds to automatically approve or reject photos. Also, you can configure the different types of people in your organization by defining profiles for each type, like Student and Employee for instance.

WORKFLOW BUSINESS RULES

One of the most powerful tools is our ability to define your own business rules and workflows to automate processes. When creating a workflow you define a sequence of tasks you carry out on a regular basis. Using business rules and workflows helps ensure all steps are met and ensure continuity in all processes.
